PROFESSIONAL SUMMARY

IT Infrastructure and Network Support professional with 4+ years of experience supporting enterprise environments, healthcare institutions, and multi-site business operations. Experienced in Active Directory administration, MikroTik RouterOS management, network troubleshooting, VPN support, remote technical support, wireless infrastructure, and enterprise application support.

Proven ability to support hundreds of users across geographically distributed locations, maintain critical business systems, troubleshoot infrastructure issues, and coordinate with vendors and service providers. Strong foundation in networking and IT operations with growing expertise in cloud technologies and cybersecurity.

CORE COMPETENCIES

- Infrastructure & Systems Support
- Active Directory Administration
- User Provisioning & Deprovisioning
- Access Control Management
- Windows Administration
- Remote Technical Support
- Incident Management
- Root Cause Analysis
- Hardware & Software Troubleshooting

Networking

- MikroTik RouterOS
- WinBox Administration
- LAN/WAN Troubleshooting
- VPN Connectivity Support
- DNS & DHCP Fundamentals
- Wireless Networking
- Router & Switch Deployment
- Network Diagnostics

Monitoring & Operations

- Zabbix Monitoring
- Infrastructure Monitoring
- Incident Detection & Escalation
- Service Availability Monitoring

Programming & Databases

- Python
 - PHP
 - JavaScript
 - HTML
 - CSS
 - MySQL
 - Microsoft SQL Server
-

PROFESSIONAL EXPERIENCE

Senior IT Executive

CG Digital Park | March 2025 – Present

- Provide technical support to users across nationwide branch locations.
- Deliver remote technical support and troubleshooting for branch offices.
- Diagnose and resolve hardware, software, operating system, Wi-Fi, VPN, and network and connectivity issues.
- Support Active Directory account administration, user provisioning, and access management.
- Coordinate with vendors, ISPs, and internal teams to maintain service continuity.
- Investigate recurring incidents and perform root cause analysis to improve reliability.
- Assist with infrastructure deployment and enterprise technology initiatives.

Key Project – Post-Disaster Workspace Relocation

- Assisted in relocation of four departments following workplace disruption.
 - Participated in deployment of routers, switches, wireless access points, and workstation infrastructure.
 - Assisted with Active Directory account provisioning and user onboarding.
 - Helped maintain business continuity while minimizing operational downtime.
-

Assistant IT Officer

Grande International Hospital | February 2022 – March 2025

- Provided IT support to over 300 hospital staff members across multiple departments.
 - Diagnosed and resolved hardware, software, network, PACS, and HIMMS related issues.
 - Supported Active Directory administration and user account management.
 - Assisted senior engineers during migration of HIMMS and email systems to cloud infrastructure.
 - Supported PACS medical imaging systems used by clinical teams.
 - Maintained and troubleshoot wireless access points throughout hospital facilities.
 - Coordinated with software vendors, cloud providers, and ISPs during service incidents.
 - Assisted with infrastructure upgrades and technology improvement initiatives.
 - Contributed to maintaining high availability of critical healthcare systems.
-

Freelance Software Developer

KFA Business School | 2017 – 2019

- Designed and developed a PHP and MySQL based Sales Tracking System.
 - Implemented role-based access control to secure business information.
 - Built reporting and analytics functionality for branch-level operations.
 - Produced user documentation and trained staff members on system usage.
 - Gathered user requirements and implemented enhancements based on stakeholder feedback.
-

EDUCATION

Bachelors: BSc (Hons) Business Computing & Information Systems

Softwarica College of IT

Affiliated with University of Central Lancashire (UK)

+2: Computer Science

Global College of Management

TECHNICAL ENVIRONMENT

- Active Directory
 - WinBox
 - Zabbix
 - Windows 10/11
 - HIMS
 - PACS
 - VPN Technologies
 - Wireless Networks
 - Routers
 - Switches
 - Remote Support Tools
-

ADDITIONAL INFORMATION

- Fluent in English
- Experience supporting multi-site business operations
- Experience supporting healthcare IT environments
